PERSONAL STATEMENT

"I have learned how to quickly think in three dimensions to shape the land, create spaces that use plants and hardscape in any medium, and be cognizant of the human experience."

SPECIAL INTERESTS

- Regionally sensitive approaches to landscape site design
- Environmental influence of design

DESIGN INSPIRATION

- The High Line designed by Dutch plantsman Piet Oudolf

Suzi Brenner

SENIOR LANDSCAPE ARCHITECT

Growing up on a farm in Indiana, Suzi Brenner cannot remember a time when she wasn't connected to nature.

Today, with more than 20 years of experience as a landscape architect, Suzi draws on a life-long passion for design and art to create highly artistic, functional spaces for luxury residences and resorts.

She began her career in the San Francisco office of Hart Howerton before relocating to the firm's London and New York City offices, where she worked on large-scale development projects around the world including Morocco, Czech Republic and the Caribbean. Learning from and collaborating with people around the world helped her broaden her design perspective.

From designing small gardens to 600-hectare resort communities, Suzi's goal is always to create healthy, holistic and sustainable environments. Her love of creating custom designs within functional spaces allows her to connect with clients and deliver the projects they dream of.

When not working with clients, Suzi enjoys creating stoneware and pottery.

Whether designing luxury landscapes or creating one-of-a-kind porcelain pieces, Suzi seeks to elevate every environment as its own unique and beautiful work of art.

EDUCATION

- B.L.A., Landscape Architecture, Ball State University
